## Education

**Nutan Maharashtra Institute of Engineering and Technology**

*Bachelor of Engineering in Information Technology (Current: 2nd Year)*

**Expected 2028**

*Pune, India*

## Certifications

**Data Structures and Algorithms (NPTEL) | Elite Status (Score: 68%)**

**2025**

- Demonstrated proficiency in algorithmic analysis, space-time complexity, and advanced data structures.

## Technical Skills

**Languages:** JavaScript (ES6+), Java, C++, Python, HTML/CSS

**Backend:** Node.js, Express.js, RESTful APIs, Middleware, Role-Based Access Control (RBAC)

**Database:** MongoDB, Mongoose (Schema Design & Aggregations)

**Security & Tools:** Bcrypt (Hashing), JWT, Cloudinary API, Git, Postman, Multer, Render

## Projects

**ShopX – Full Stack E-Commerce | Node.js, Express, MongoDB, JWT, Bcrypt**

**2025**

- Engineered a production-ready backend featuring **Bcrypt** password hashing and **JWT** with HTTP-only cookies for secure, stateless authentication.
- Developed a unique **Multi-Cart System** allowing users to switch between multiple active shopping sessions concurrently.
- Integrated **Cloudinary API** for cloud-based media management, handling dynamic product image uploads via Multer.
- Architected an **Admin Dashboard** with role-based routing to manage users and products securely.
- Successfully deployed the full-stack application on **Render** with environment variable protection.

**Personal Portfolio Website | React.js, Tailwind CSS, Framer Motion**

**2025**

- Designed a responsive, logic-focused portfolio to showcase backend system architectures and DSA certifications.
- Implemented clean UI/UX components with a "Hunter Green" technical aesthetic and optimized for fast loading.
